DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-16 and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson [US 6,445,271].

Johnson discloses a micro-coils of an inductive component in planar substrates [figures 1A-2C] comprising:

- a substrate [11];
- a plurality of conductive lines [17], each of which extends along a bottom surface of a trench [19] in the substrate, along opposing sidewalls of the trench, and along an upper surface of the substrate at both sides of the trench;
- wide/conductive bonds interconnecting portions [16] connecting with the plurality of conductive lines forming a plurality of windings for the inductive component; and
- a magnetic material in the trench as a core [20] for the inductive component [column 6, lines 61-64.]

Regarding claims 14-16, the claims method steps would necessitate by the apparatus.

Response to Arguments

Applicant's arguments filed 8/23/2005 have been fully considered but they are not persuasive.

Applicant argues that:

- [1] Johnson fails to disclose a "wire bonding" technique; and
- [2] Johnson do not include "wire bonds".

The examiner disagrees.

Regarding [1], as acknowledge by applicant, the "wire bonding" technique is a technique that involves forming an interconnection with a thin wire. Applicant had not claimed, nor had examiner considered, any structure of the thin wire. Applicant merely claim, in claim 21, a plurality of conductive lines. The final product of Johnson discloses the apparatus [induction device] of the claimed invention. The claimed method steps would necessitate by the apparatus, see above.

Regarding [2], Johnson discloses the bonding structure [14, 15 of figure 3] between the conductive lines.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TUYEN T. NGUYEN whose telephone number is 571-272-1996. The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, ELVIN ENAD can be reached on 571-272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
